

## CZAME H724

### A smart platform for extended life at home and a faster response to seniors

Living at home safely, longer and with more freedom is what CZAME H724 allows. Thanks to Artificial Intelligence and IoT sensors, our platform anticipates risks and assists seniors and people with a loss of autonomy on a daily basis.

- **Tangible benefits for seniors, their families and caregivers**
- **Less stress and more safety:** Automatic fall detection, monitoring of physical activity and health parameters thanks to the Czame watch (heart rate, movements, etc.).
- **Reduced emergency response:** With early warning and intelligent tracking, caregiver and caregiver response time is reduced by two-thirds (2/3).
- **Risk prevention:** Proactive monitoring to prevent falls, detect heart rhythm and report abnormal situations.

- **Reduced water damage:** Immediate leak detection with automatic valve closure, thus limiting insurance and repair costs.
- **Location and assistance in case of wandering:** Intelligent indoor and outdoor tracking system, allowing to quickly alert caregivers in case of need.
- **Reduced costs in the event of a search for missing persons:** Thanks to the GPS integrated into CZAME watches, search costs are reduced by 70%, with an average saving of \$1000 per search according to police estimates in Quebec.
- **Facilitation of administrative tasks:** An AI assistant takes care of a large part of the readings and reports, reducing the burden on caregivers.
- **Fewer moves to CHSLDs or RPAs:** An estimated 20% drop in applications after one year of use in cooperatives.

### Humane and caring assistance with OLIVIA

OLIVIA is your intelligent voice companion that watches over you at all times. In the event of an incident, she guides you and informs your loved ones immediately. Example:

"Hello Paul, I detected a fall in your apartment. Don't try to get up alone. Your friend Jacques has been alerted and will arrive in 4 minutes. Confirm to me that you have understood me. I am watching for Jacques' arrival and will let you know as soon as he is at your door. Stay calm, your son is also on his way and will be there in 15 minutes. »

### An integrated community of mutual aid

With the NotifAideMoi app, you can schedule requests for help to your friends and neighbors who use the NotifAide app, for quick and efficient assistance.

**CZAME H724: Safety, autonomy and peace of mind for you and your loved ones.**
